

Office Memorandum • UNITED STATES GOVERNMENT

TO : Colonel Burke

DATE: 10 December 1958

FROM :

SUBJECT: Kelly Johnson's Comments on Service Bulletins, dated 3 Dec 1958

1. The writer has discussed these comments with Operations and it is the joint opinion that the only change in LAC procedures that would need to be accomplished would be in the distribution of preliminary copies of Service Bulletins. Such increase to provide for one copy to

and another copy for Headquarters.

2. This falls in line with Kelly Johnson's comments in that he recognized the possible need to amplify the distribution list.

3. Under the current procedure as outlined, approval is signified in a passive rather than positive manner, in that if nothing is heard in a reasonable time, LAC proceeds to make kits and ship to depot. It might be well for the Project to signify approval in all cases. Such approval to go from to LAC and whenever deems it necessary he will solicit approval from Headquarters prior to taking action with LAC. This will also coincide with the Project Test Directive.
